

❖ IN THE CASE OF DANGER, CAR DEFECT, TRAFFIC JAM OR AN ACCIDENT

Switch all four light indicators, gradually stop the vehicle on a side track and turn off the engine. Leave all fours blinking.

In the case of an accident, stay in your car, wait for the intervention team or act according to the special road signals that are used in special road situations.

BEFORE LEAVING THE CAR, CHECK IF ANOTHER CAR IS APPROACHING YOU! GO OUT OF THE CAR THOROUGH THE RIGHT DOOR! Wear a fluorescent safety waistcoat!

In case that the car in front of you is in defect or you find a traffic jam, switch all four light indicators in order to leave enough space between your and the approaching car.
